

## BUSINESS & INDUSTRY PARTNERS

Business and Industry partnerships help shape the lives of Center High School students and the future of the workforce by bringing expertise, providing leadership and opening opportunities. Business & Industry partners can assist by:

<i>Hire Students</i>	Reach Center HS students directly by listing employment opportunities with the CTE Career Prep program
<i>Host Student Internships</i>	The premiere form of work-based learning is student internships, or a high school practicum course. Practicum courses are offered during a student's senior year of high school and allow the student to earn school credit while leaving campus to work at a job relevant to his/her career pathway/program of study. These internships can be paid or un-paid and must allow the student to work a minimum of ten (10) hours a week.
<i>Provide Field Experiences</i>	The best way to build student interest in an industry is to provide hands on learning of what it means to work for you. Invite a class to find out exactly what you do on a day-to-day basis. The organization or business can host a tour of your facility where our students can hear firsthand what it takes to work on the industry!
<i>Guest Speakers and Other</i>	Can't host at your business location? CHS invites you to come to the campus to provide talks, demonstrations or activities related to your industry. Industry representatives are a wonderful compliment to career education classrooms. You are invited to enter a classroom and support learning by helping students make connections to your real-world career. Commit to participate in any college/career day programs! Provide an exhibit that allows for one-to-one conversations with students about career opportunities in your career fields!
